Chartmetric Take-home Assignment

Hi! Thank you for your interest in Chartmetric. This take home assignment is for us to determine your current experience as a Software Engineer. Don't worry, you don't need to finish the assignment, but we do ask that you respect the honor code and are truthful in your answers and that you abide by the rules of this assignment. If any of it is unclear, don't worry, use your best judgement and work with what you got!

This assignment will have a time limit of 24 hours from when you finish reading the instructions, you will have two options to choose from:

Option 1 - Create a web page to display a set of data from a given CSV file.

Option 2- Create a server for us to test and successfully call for data from a CSV file.

Feel free to use any language, framework, etc., you deem fit for your assignment. Treat this assignment as though you are in a work environment and that all online resources are accessible, yes, even Stack Overflow is okay! 😜

Once you've completed the coding portion, please also submit documentation of the following:

● Which assignment you worked on
● How long you spent on the project
● Instructions on how to run and/or use your assignment
● Explanation of any struggles of the assignment (if any)
● Any other documentation that you think would be helpful/useful

Once you are completely done, please submit the following in a ZIP folder to victor@chartmetric.com:
● Source code of the assignment
● Any documentation you wrote (You can name this README if you can't decide a name)
● A picture of your favorite anything! Here's mine:

Remember, this assignment does NOT need to be completed. Just do your best and have fun with the assignment. Look forward to seeing what you come up with! 😁
